# MARRIOTT SENIOR VOLUNTEERISM STUDY

In 1991, Marriott Senior Living Services and the United States Administration on Aging commissioned ICR Survey Research Group, a prominent national polling organization, to conduct a nationwide study of older Americans on their attitudes and practices regarding volunteerism.

The study primarily focuses attention on seniors who have volunteered their services during the past year, as well as potential and non-volunteers. It identifies the current level of senior volunteerism, the types of activities they prefer to do and organizations for which seniors want to volunteer. The study looks into what motivates seniors to donate their services, how they find out about volunteer opportunities and whether or not they feel government, businesses and non-profit organizations are doing enough to promote and provide volunteer opportunities.

## Methodology

The Marriott Senior Volunteer Study was conducted by ICR Survey Research Group of Media, Penn., during January and February 1991 and included 962 telephone interviews with respondents 60 years of age or older. The sample utilized a random digit dial design and all interviews were conducted through EXCEL, ICR's omnibus service. The sample frame uses a single stage selection - that is, all households in the country had an equal opportunity for selection. Respondents selected for this study were chosen based on the "next birthday" method. Interviewing was monitored to assure accurate demographic distribution.

The results of 962 interviews are reliable within a plus or minus three percent sampling error at the 95 percent level of confidence.

## Study Highlights

- o Over 41 percent (15.5 million) of the 37.7 million Americans 60 years of age and older performed some form of volunteer work in the past year. The 65 to 69 and 70 to 74 age groups had the greatest percentage of volunteers, 46 and 45 percent respectively. Seniors over the age of 80 had the smallest percentage of volunteers, 27 percent.
- o Fourteen million older Americans (37.4 percent) are potential volunteers who are or may be willing to volunteer if asked.
- o Among current volunteers, 25.6 percent (4 million) indicated they would have preferred to volunteer more time if asked. Of these, 52.1 percent (2.1 million) would have volunteered more days and 31.4 percent (1.2 million) would have volunteered more days and more hours.
- o Seniors volunteered an estimated 992 million days generating 3.6 billion hours of volunteer service during the past year. On average, seniors volunteered more than one day a week or 64 days a year. The average amount of time seniors volunteered per day was 3.6 hours.

- o Forty percent of seniors who were asked said they feel the federal, state and local governments are doing less than they should to promote and provide opportunities for volunteerism. Only nine percent felt the federal government was doing more than it should. Three out of four older Americans (74 percent) felt people should offer more time to volunteer activities than they do currently.
- o Eighty-three percent of seniors said they performed volunteer services in order to help others, while 65 percent did it to feel more useful or productive. Slightly over one-half of those asked felt they volunteered to fulfill a moral responsibility (52 percent) and almost one-third volunteered because they felt volunteering was a social obligation. One out of four seniors volunteered as a way of finding companionship and only five percent volunteered to alleviate feelings of guilt.
- o Although there were more women (8.2 million) volunteers than men (7.3 million), percentage of volunteerism was actually higher among men (45.5 percent) than women (37.9 percent).
- o Education played a significant role in determining the level of volunteerism among seniors. Over 66 percent of older Americans with college degrees performed volunteer services while only 37.5 percent of those with only high school diplomas provided services.
- o Most seniors (57 percent) volunteered their services to church or religious organizations, followed by social service agencies (32 percent), civic or cultural organizations (25 percent), schools or educational institutions (22 percent), and health-related organizations such as the American Red Cross or the Alzheimer's Association (16 percent). Less than 10 percent said they donate time to a political party or campaign. Among potential volunteers, retirement communities replaced social service organizations as the second most preferred organizations for which to volunteer.
- o Providing companionship, either in person or by telephone (42 percent) and providing transportation (41 percent) were the two volunteer functions performed more often by seniors, followed by providing advisory services such as serving on a board or committee (37 percent), providing instructional or educational services (32 percent) and assistance-with fund raising efforts (31 percent).
- o In order of preference, older volunteers like to volunteer time helping children (35 percent), other older adults (32 percent) and people with disabilities (29 percent).

#### More Information

For more information about the study, please contact Rick Sneed, Marriott Public Relations, 301/380-5177. Additional copies of the study are available for \$5.
